

Stillwater Geothermal

Plant Site, Production well, Expansion

Locale	Fallon, Nevada United States
Status	Operational
Owner(s)	ENEL

Power station information

Primary fuel	Geothermal
---------------------	------------

Power generation information

Installed capacity	33 megawatts
---------------------------	--------------

MIDC's principles, D. Murphy, D. Abraham, and William Golden formed Geothermal Management Services, LLC and acquired the Stillwater Project through eight separate transactions; repowering from 6MW performance to 12.5 MW nameplate. Geothermal Management Services, LLC performed all facets of the geothermal development and power production: management, land acquisition, geothermal resource identification & development, engineering, operations and technical execution. Developed additional 20MW using new adjacent wellfield and unique underground gathering system. Sold to ENEL.
