---------------------------	------------------

MIDC located, purchased, and resold Two (2) W251B12 GT's for the Idaho Power's Evander Andrews 100 Mw Peaker plant - at the height of the California Energy Debacle. MIDC brought in the turnkey EPC contractor Innogy (now **RWE**) who constructed, commissioned and brought the project into commercial operation on a Fast-Track Contract in just 16 weeks, two weeks ahead of schedule.
